 - West facilities — T348
 - East litter pickup — T316
 - West litter pickup — T346

Catch the Action at Action Center D

Where's the action at the Jamboree? At Action Center D! This area, located right across from Subcamps 1-3, offers 10 exciting activities:

Air Rifles	Buckskin Games
Archery	Bike Motocross
Bikathlon	Pioneering
Trapshooting	Rappelling
Action Alley	Confidence Course
Camp Thunder	

Fly through the trees on the "zip line" or the "flying squirrel" at the Confidence Course. Step into the role of a mountain man at Buck-

skin Games, and try your hand at axe throwing or shooting black powder. Learn Pioneering Physics and get cool ideas for building stuff with rope - just look for their totally awesome flag pole!

Looking for more action? You can ride a bike, shoot, or rappel off a 40 foot tower. Don't miss any of these great activities. Action Center D operating hours are from 9 AM to 5 PM daily, subject to change (particularly during arena show days). Come on over! Action Center staff are ready and anxious to meet you and give you a Jamboree experience you'll never forget.

Welcome to Subcamp 3!

Scouts and Scouters from across the Northeast Region filled our Subcamp yesterday as part of the 9,000 volunteers and 36,000 Scouts attending this year's Jamboree. The steady stream of arriving contingents started with the first bus at 6:30 AM and continued until close to 3:30 PM.

After unloading their buses and trucks, troops set up their tents, built picnic tables, filled water jugs and built gateways to make their troop homes more comfortable.

Chaplain's Corner

“ Geocaching is a quest for a hidden treasure using a GPS device, and can be an exciting activity. God-caching does not have to be a quest. Finding God is as easy as welcoming God into our lives. *No quest involved*, but a grand and exciting adventure indeed. ”

—Chaplain Robert “P-Rob” Lewis

Today's Historical Events

- 1789—The Department of Foreign Affairs, forerunner of today's State Department, was chartered by Congress.
- 1940—Bugs Bunny made his debut for Warner Bros.
- 1974—The House Judiciary Committee voted to recommend President Nixon's impeachment to the full House
- 1996—A pipe bomb exploded at a public park during the Olympic games in Atlanta

News Headlines

- A state of emergency was declared for Chicago and the surrounding communities after heavy rains Friday and Saturday caused widespread flooding.
- The Hudson Valley town of Rhinebeck is preparing for Chelsea Clinton's expected wedding this weekend, though shopkeepers are tight-lipped on the details.
- The Library of Congress released new copyright rules that allow iPhone owners to legally “jailbreak” their phones to use non-approved software.

Make Mom Proud!

With the abundance of cameras that never made it home from the 2005 Jamboree, we want your camera to go home with you this year.

We suggest that you take a picture of your Jamboree ID, which includes your troop number. Don't delete that picture until you get home. If your camera shows up at lost and found, we'll know who to return it to.

Duty Hours

Shower Monitor - Eastern Showers

- 5:00 - 7:00 PM T313/T327

Boating Staff

The bus to Travis Lake Headquarters will start at Subcamp 1 at 7:45 AM, followed by Subcamps 2, 3, 4, 5.

Stuff You Gotta Know

Besides Scouts, there are Others

Fort A. P. Hill is hosting not just the tens of thousands of Scouts and Scouters, but also countless numbers of much smaller creatures. There are a large number of different insects and arachnids, some of which carry diseases.

Perhaps the menaces that first come to mind are the various ticks present. Among the diseases transmitted are Rocky Mountain Spotted Fever and Lyme disease.

If you find an attached tick, do not try to remove it. Go to the medical facility and they will remove it. Improper removal may leave the

head behind, which can cause difficulties. The tick should be tested to determine if it is carrying disease.

To cut down on the chances of being tick food, stay away from tall grasses and out of the woods. Your chances can be further improved by the use of repellents such as DEET and Permanone. For bee stings, please mark the location of the bee hole so we can remove them.

Still more hot than comfortable? A quick way to judge if you need to drink more water is to observe the color of your urine. If it looks like Mountain Dew® then you need to drink much more water. If your urine looks like Sprite® then continue to drink at the same rate.

Want to prevent colds, diarrhea etc? Please wash your hands frequently: after the bathroom, before food preparation, before eating, and just for the fun of it. Hand washing is the single most important method of not infecting others. One last tip: cover your mouth and nose when you sneeze.
